Préparation du meuble pour l'utilisation après le déballage.

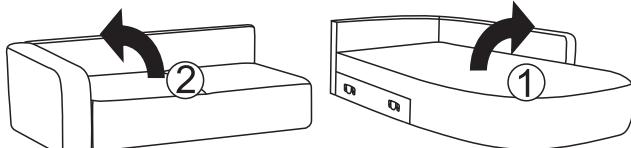

Après le déballage, il faut remettre manuellement les coussins en forme. Cela accélérera le processus de formation correcte et le retour à la forme originale. Les meubles sont transportés en voiture, parfois ils parcourront de longues distances de l'usine jusqu'à vous, c'est pourquoi il est conseillé de former le meuble à la main. On fait la même chose avec tout le revêtement (la housse).
